EXPERIENCES

Xenarchs (Contractual)

August 2026 - Present

Software Engineer

Remote, Bangladesh

- Developing a **Cleaning Management System** for an Australian client, implementing service management and booking workflow to streamline customer bookings and reduce manual inquiry handling.
- Designing and implementing scalable architecture for **booking, referral, wallet, payment, and role-based Customer/Admin management** to support maintainability and future feature expansion.

Workspace Infotech Ltd.

January 2026 - July 2026

Software Engineer

Dhaka, Bangladesh

- Built high-performance scraping Queue Jobs for **2M+ vehicle records**, reducing processing time by **60%**.
- Built a role-based appointment module that reduced manual access issues by 70% and streamlined appointment handling.
- Fixed and optimized existing system issues to improve **application stability and performance**.

Lion Coders

January 2022 - December 2025

Software Engineer

Chittagong, Bangladesh

- Developed and maintained **multi-tenant SaaS HRM (PeoplePro)** and **E-commerce (Shuddho Khamar & CartPro)** platforms.
- Contributed to **500+ script sales** with **85% client satisfaction**.
- Built **Version Elevate** package, reducing support load by **60%**.
- Optimized queries and fixed complex issues, achieving **30–70% performance improvement**.
- Integrated local payment gateway **bKash** on **Shuddho Khamar** and **Max Technology**. Also integrated **PayPal, Stripe, and SSLCommerz**.
- Actively participated in requirement analysis by thinking from both user and client perspectives to deliver practical and business-oriented solutions.

SKILLS

Languages: PHP, JavaScript, SQL

Technologies & Tools: Laravel, MySQL, React, jQuery, Ajax, REST API, Bootstrap, PEST, Git, GitHub, Postman, Trello, Jira, cPanel, Plesk

PROJECTS

PeoplePro 🔗 and SaaS 🔗

- Led the backend development for the restructured **payroll module, integrated IP-based attendance, performance tracking, role permissions, and email & db notifications**.
- Developed a **Multi Tenant SaaS** version with separate subdomains and databases, improving scalability.

CartPro 🔗

- Improved backend efficiency by reducing **query load (79%)**, **response time (59%)**, and **memory usage (13%)** through code refactoring, caching, and query optimization (e.g. database indexing, eager loading).
- This versatile platform offers an Ajax cart, quick search, filters and secure payment gateways (**Stripe, PayPal, COD, bKash**) for a seamless shopping experience.

Shuddho Khamar 🔗

- Contributed to developing an e-commerce platform for agricultural businesses.
- Implemented **Slaughtering Service** and **bKash** payment gateway.

COMPOSER PACKAGES

- **Bkash Tokenized Checkout**  – Payment gateway solution with Laravel-based application that fits all business needs and enriches the customer's secure online payment experience.
- **Version Elevate**  – Notified clients about new version releases and enabled one-click migration to the latest version, reducing manual upgrade effort by 90%.
- **Laravel Repository Maker**  – Auto-generate the necessary files for the repository design pattern structure.

EDUCATION

International Islamic University Chittagong (IIUC), 2017 - 2022
B.Sc. in Computer Science & Engineering

TRAINING & CERTIFICATION

Database for Software Developers, Ostad October 2023 - March 2024

SQL (Advanced) Certificate, HackerRank December 2023

Web Development Course With React, Programming Hero June 2022 - December 2022

PARTICIPATION & ACHIEVEMENT

Banglalink SDG Hackathon 'Code for a Cause' 2.0 2020

- Participated and developed a digital learning solution idea for rural areas.

Intra University Hackathon at IIUC 2017

- Position: 15th out of 50 teams.
